KALDOR GENESIS part TWO

Another bright sunny day in KALDOR CITY and a news report is broadcast to all citizens on tannoy speakers above fire exits , residential buildings and offices .

At PRECINCT 101 ,in zone 5 adjudicators are in there class room getting a mission briefing from COMMISSIONER MILES while they're putting on their blood red uniform.

From tannoy speakers above a fire exit comes the daily news report hosted by Graham Stringer and Tula Reese.

TULA REECE PRESIDENT VANESSA BELLAMY Inaugurating the new high council of the galactic Federation on CANDERELL an M-Class Tropical Paradise.

GRAHAM STRINGER CANDERELL has two land masses surrounded by four oceans with two ice caps it it's polar regions .

TULA REECE PRESIDENT VANESSA BELLAMY is in the one piece off the shoulder number created by her friend ZURELL of high fashion shops.

GRAHAM STRINGER Soon to be in a shopping mall near you.

TULA REECE With Vanessa Bellamy is GENERAL WILLIAMS in his blue safari suit to welcome Ambassadors to the new high council building.
GRAHAM STRINGER For the start of this season the Ambassadors are wearing costumes reprisenting all the animals throughout the entire galactic Federation.
TULA REECE Including the birds of the air and the land mammals.
GRAHAM STRINGER This is of course if the animals can't speak for themselves.
TULA REECE Senior technician POTASSIUM.
GRAHAM STRINGER In a silver JUMPSUIT .
TULA RECCE POTASIUM is working on a universal translator to be given to the space Patrol in the field in order to communicate with every sentient life form.
GRAHAM STRINGER Until that time the animals are represented by high council members in full costume,
TULA REECE Created by the ZORELL high fashion chain, a personal friend of the president.
GRAHAM STRINGER I went to school with both of them, ZORELL was always borrowing my pencil.
ADJUDICATORS in there blood red uniform, with silver moon boots and flowing white cape are sitting opposite traffic cops in there white uniform with green floor length cape.
GAVIN SAUNDERS I hope you ADJUDICATORS realise if you see us on the streets you have to have your coffee black.
RELL This sports event between zone 10 <MANTA residency and zone 2 CYPRUS CORNERS.
COMMISSIONER MILES We'll be joined by 10 of the new Hunter robots K1-10 series straight off the assembly line .
STENTON RELL They'll be policing with you and they'll be bringing in 10 suspected SPECTROX runners from ANDROZANI MINOR with false who we think have got false identification.
COMMANDER MAXILL So we really want to bring them in and to check their bio scans with their ID .
STENTON RELL Only the new hunter seeker class k1 to k10 can do this in the field disabling the subject by

sending a thermic pulse to the chip implanted in younger citizens .
COMMANDER MAXELL And this latest wave of V-O-C that have gone rogue and disobeyed orders might be the excuse we need to bring in the K1 Hunter series .
STENTON RELL We got to convince the people that everyone must be chipped and there'd be no more false identifications .
COMMISSIONER MILES Some of you'll be riding the new servo robotic horses .
COMMANDER MAXELL My team know what they're doing commissioner.
STENTON RELL Partner up with one of the new k-series Hunter robots and help to bring in the perp once he's disabled it with bluetooth remote control tuned to the chip implanted waste height leaving them prone on the floor with their legs spread .
COMMISSIONER MILES MOON BOOTS AND DINNER SUITS.
STENTON RELL Let's get to work .

STENTON RELL and his troops take a travel tube from precinct 101 through a clear perspex cylinder over the skyline of KALDOR towards the football station .

AVON Who's playing sarge.

MAXELL It's the normal block contest CYPRUS CORNERS versus MANTA.

AVON I'm supposed to support MANTA .

STENTON RELL That's because you live at CYPRUS CORNERS .

The travel tube deposits them at ground level of ZONE 2 and they walk across a paved courtyard to the domed lattice structure of CYPRUS CORNERS that contains a community next to a sports arena.

STENTON RELL The plasma rifles are just a show forse .

AVON I was shot by plasma rifle.

RELL It took me three weeks to recover .

AVON Couldn't sit down for a week .

They greet Spectators entering CYPRUS CORNERS and across a shopping mall towards the arena.

ADJUDICATOR RAVEN Be at peace with the world .

RELL gets a call on his wrist comm.

LANDERCHILD We need an escort to the Research Dome.
He says goodbye to his comrades who are partnered up with V-O-C robots checking ID into the arena stadium for the football match,and walks across a maroon marble floor of Manta residency past shop fronts through a revolving glass door then across the paved courtyard onto the rapid Transit conveyor.
He joins the ground traffic of citizens on a "rapid transit conveyor", through KALDOR CITY. It's late evening and street lights cast isolated silver pools along through recreation fields.
LANDERCHILD and COMMISSIONER MILES our waiting with hunter robot K1.
RELL K1 thought you'd be chasing suspects.
K1 I can apprehend any KALDOR citizen and cleared throughout the city.
LANDERCHILD The first of the hunter seeker robots is ready, aren't you k1?
COMMISSIONER MILES Central opps, is under pressure from the news agencies to follow a manhunt.
LANDERCHILD Shall we go, senior technician LAGO, has an experiment to show us.
RELL escorts his charge of high councilors across a central plaza and into a clear perspex travel tube
,taking them up from ground level and across the skyline of KALDOR CITY towards ZONE 5.
COMMISSIONER MILES We must see the results of Lagos experiments.
RELL Once you've seen what the rutons can do mimicking other species you'll understand what we're up against .
The travel-tube glides into a multi-storied green dome ,and they're deposited in one of the upper levels ,where they disembark and follow a green laminated wide lobby of KALDOR RESEARCH DEPARTMENT to a sliding door marked top secret .
An INTERCOM lets them in and they find themselves in a white room with walkways and partitions then take steps to an observation gallery with a guard rail above the laboratory units .They follow RELL to stand and observe events below, as two

V-O-C robots enter from stage left followed by technician LAGO.

LAGO Just in time first master, i'll set up and monitor with you up in the gallery .

RELL I was giving him an update on our successful mission to GALDA PRIME my friend.

One of them mimicked one of our citizens.
LAGO An archivist. and took blueprints for our V-O-C, that are highly prized by them.Me and RELL tracked it to GALDA PRIME.
LAGO Since then the RUTON has replicated using binary fission and we have a group to experiment on.

COMMISSIONER MILES The blueprints for V-O-C where taken from your assembly line ,and you discovered it was a rutan spy ,in the identity of one of your technicians .

LAGO Me and RELL followed the rutan off planet and I now have a group of rutans replicating that i can use to make a tracker.

LANDERCHILD That can find a spy in our midst.

RELL That's the plan, it's either that or any of our citizens ,even high council members, could be rutans mimicking KALDOR CITIZENS .

LAGO I've managed to get our rutan to take on the form of a DENTRASI, and if you observe the readout console ,I can compare it to natural livestock .

From the viewing gallery 12ft above, they observe a V-O-C robot bringing in a plump three legged animal with a round head and attaching a lead to a tiled cubical in the centre of the laboratory .

LAGO SV46 UNLOCK THE SEYMORES CELL DOOR.

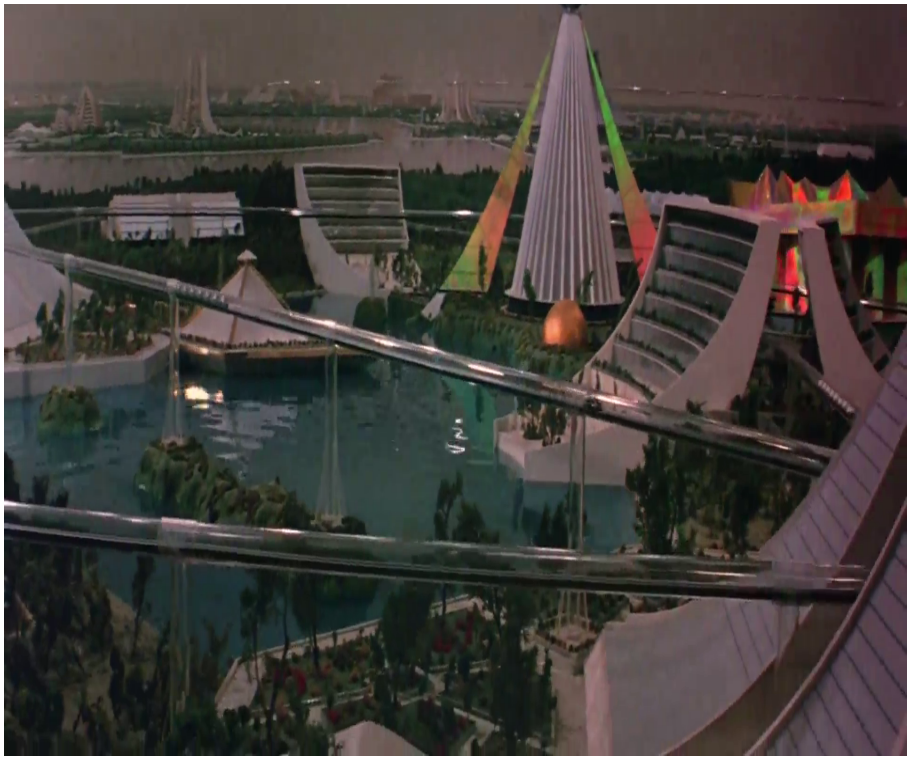
LANDERCHILD This alien critter safe?

RELL They can kill, that's why we have they precautions.

A metal door slides back revealing the incubator room and a 2ft round sphere crawls up a ramp into the room towards the tethered animal emitting a crackle of energy .
LANDERCHILD Is this going to hurt the animal ?
LAGO I wouldn't like having my life energy sucked out by an alien , who mimics my cell structure .
The green sphere glides towards the DENTRASI omitting a deep rumble and envelops the creature.
LAGO SEYMORE HAS FUSED WITH THE DENTRASI AND ITS BIOLOGY WILL TRANSFORM.
RELL THAT'S A POLITE WAY OF SAYING SEYMOURS REPLICATING INTO THE FORM OF THE DENTRASI.
COMMISSIONER MILES YES VERY INTERESTING GENTLEMEN BUT WHAT DOES THIS HAVE TO DO WITH EARTH ALLIANCE.
LAGO I' HAVE TO FIND A WAY OF DETECTING A RUTON WITHIN OUR GROUP DISGUISED AS A HUMANOID, AND THIS IS THE PRELIMINARY TEST.
RELL WHAT HE MEANS IS THAT IF OUR THEORY IS CORRECT, EARTH COULD BE FACING AN INVASION FROM OUR SECTOR JUST BY COMING INTO CONTACT WITH US AND LEARNING OF YOUR ARRIVAL .
COMMISSIONER MILES If they make it back to earth and infiltrate there government the consequences could be disastrous.
LANDERCHILD They'll re-organise society based on ability rather than favouritism, and get rid of monetarism.

In the research bay below, the RUTAN is taking on ther form of a DENTRASI .
LAGO SEYMORE HOW ARE YOU.?

RELL WE NAMED THE RUTON SEYMORE AFTER WE PICKED HIM UP ON GALDA PRIME.
LAGO THIS IS SEYMORE 7, THE BLIGHTERS BREED AND MULTIPLY BY BINARY FISSION.
LANDERCHILD Like backteria, how nice for them, not the pleasures of ARCADIA for them RELL.
RELL Exactly first master.
COMMISSIONER MILES So it's this chgaps fault earth could be assimilated into the RUTAN gestalt .
STENTON RELL WHY DO YOU THINK THE SONTARONS HATE THEM .
LANDERCHILD Yes it's time the GALACTIC FEDERATION found a solution before the SONTARANS wage war with us.
COMMISSIONER MILES They have the blueprints and are looking for a base to build V-O-C of there very own ?
LAGO When these tests are complete i should be able to detect a RUTON in our midst, even in public places where citizens are congregating.
LANDERCHILD Like restaurants, and sports stadiums?
RELL I'LL TAKE YOU TO CYPRUS CORNERS, OUR RESIDENTIAL BLOCK AND WE'LL WAIT FOR THE RESULT OF THE TEST.
LANDERCHILD LEAD ON THEN RELL.
RELL SV54 clear a flight plan to CYPRUS CORNERS, where coming to the roof garden THANKS CASTAN, I'll leave you to your researches and take the FIRST MASTERS to BRONZE ZONE ONE.
LAGO I'll send you a report.
They leave the top secret research laboratories and take a travel tube to the roof garden . RELL escorts his executives across a green laminated floor into a clear perspex Dome giving a panoramic view of the City from high altitude.
LANDERCHILD I'll be on blue channel to low 800 to inform the high council.
v94 walks across the pavel SKYGARDEN it's pneumatic legs making a squelching slapping sound on tarmac.
V94 Shuttle ready for the gold residency in ZONE ONE.



As B54 shuttle glides from it's docking silo it's doors open from the top of it's cab, with thrusters ready to fire it the back when it's vertical maneuvering lift off jets clear SKYGARDEN .
From tannoy speakers above the fire exit comes the mid-day news.
GRAHAM STRINGER A large consignment of V-O-C robots have left their docking stations heading for the dimension Gate in the center of the city.
STENTON RELL I told you this would happen if the SONS OF KALDOR are infiltrating our technicians on the assembly line.
Largo comes in from the travel tube.
CASTAN LAGO Have you heard the news you'll have to start shutting the V-O-C down until I can overhaul their operating systems.
LANDERCHILD That will bring KALDOR CITY city to a standstill it can't be done LAGO.
RELL Shut them down LANDERCHILD or you'll have a robot Revolution bigger than that one on STORM MINE 4, all those years ago .
COMMISSIONER MILES That time it was dure to a latent

program left by TAREN CAPEL.
LANDERCHILD Well you have to go and investigate I'll see you in company central in the morning.
RELL V46 unlock the flyer and key in flight plan to CYPRUS CORNERS.
V46 It’s the rush hour commander, you should have called ahead.
RELL I was’nt expecting a group of humanoids from the other side of the galaxy to turn up on my patch v46.
V46 I’M CLEARING A FLIGHT PLAN NOW COMMANDER
The flyer lifts of the top of the skyscrapers and points its way through the mid morning traffic through the buildings of KALDOR CITY then sets down on the SKYGARDEN of CYPRUS CORNERS ZONE ONE.
LANDERCHILD While I'm waiting I've got to go and see CARNEL and set up regular meetings with the VISCOUNT committee on Earth.
THey walk over the paved SKYGARDEN past tulips and chrysanthes in plant boxes through a perspex wind canopy to an alloy cylender calling a tyravel tube .
LAGO WHAT ARE YOU DRINKING.
landerchild anything cold.
The travel tube deposits them at LANDERCHILD'S suit of rooms and they step over a persian rug past a roaring fire in the main support wall and collapse onto a corduroy mauve sofa .
V45 walks over a persian rug with a tray of lime juice cordial on a silver tray and deposits it on a glass table in front of LANDERCHILD.
GRAHAM STRINGER V-O-C robots walked out of the assembly Lines after being activated by senior technicians.
TULA REECE It's believed that their operating systems were augmented by saboteurs during the final assembly.
LAGO I could have told you that, FIRST MASTER, you didn't need to tell all citizens of KALDOR CITY
.
LANDERCHILD We're keeping a close eye on V-O-C robot malfunctions, LAGO thinks there's a robot revolution coming.
GRAHAM STRINGER Citizens of being advised not to approach groups of V-O-C robots who are making for the dimension

Gates in the center of KALDOR CITY .
TULA REECE Another large group made it to the perimeter wall and used a fire exit to enter the blind heart desert.
GRAHAM STRINGER SENTINEL VI up in geostationary orbit is tracking V-O-C.
COMMISSIONER MILES So what do you think this happened Largo.
CASTAN LAGO The SONS of KALDOR have found the journal of TARON CAPELLI and reinstalled his programs into their operating systems.
STENTON RELL My Adudicators have tried using the shutdown codes they don't work .
COMMISSIONER MILES And they scratch their Insignia off the breastplate we can't shut them down.
LANDERCHILD The SUPERVOC network say V-O-C need to upload into a mainframe before the end of their work shift .
CASTAN LAGO to keep the long-term memory that's what V-O-C complain about.
but they can't find a first master Who if I was you first master I'd let some supervok to the high council of Caldwell to where their grievances
CASTAN LAGO I'm designing a docking station which will include an upload into the SUPERVOC mainframe.They can then supervise the older servo mechanisms from the lowly services to the highest V-O-C robot.
LANDERCHILD If they can maintain there long-term memory then they won't go haywire.LAGO
get on with docking station before we have a major robot Revolution.
RELL SONS OF KALDOR Are influencing high council members with their robophobia
LAGO That's why I must feel complete overhaul and let V-O-C upload their memories at the end of their workshift .
STENTON RELL It might be the only way you stop a robot Revolution.
LANDERCHILD have you managed to round up the SONS OF KALDOR who stole the blueprints from the panopticon archives .
STENTON RELL I found there in a blockhouse the other side of this of the Desert, though i'm waiting for authority a raid them .

LANDERCHILD But the bird has flown along with our latest , Arabs in the desert and ratbags who complain all the time .

RELL I've never heard of TARONIST CELLS being called that .

LANDERCHILD CARNELL set them up after that incident on STORM MINE FOUR, when the VOC robots went on the rampage .

RELL Yes but that was years ago LANDERCHILD, they're a bunch of NOMADS who think there rebelling against the company .

RELL Thank you first master but getting back to the problem of the rutan and invasion .

COMMISSIONER MILES Some of them are getting in by hitching a lift on transporters from the blind heart desert an outline facilities .

LANDERCHILD That's as may be, but with increased aggression from NIMBUS 3 planet of the RUTONS.

RELL And our new friends from the VISCOUNT facing invasion on earth.

LAGO I've been designing a MOBILITY SCOOTER for our squid like friend that he can manipulate with his electrical power .

LANDERCHILD Explain LAGO.

LAGO Trust me when I tell you they're green with evy at out versatility ,they are like giant squids in sand pools of NIMBUS 111, they only achived intelegence when our GALACTIC FEDERATION left comunication satelights in there upper atmosphere .

RELL And now they want to control the universe?

LAGO The MOBILITY SCOOTER will have a metal sphere with touch plates that the RUTAN can manipulate with his mind and levers for its vestigial limbs , with an eye stalk that swivels around on its head. I'll place the metal sphere in a poly carbide casing and fix sensor arrays to the hull.

LANDERCHILD And how will this extraordinary machine move ?

LAGO ON RUBBER WHEELS IN ANY

DIRECTION .

RELL TERRIFIC.

LANDERCHILD They'll never be full members of our society but they might have uses, if you can make them LAGO.

LAGO I intend to make them fully interactive and able to communicate.

RELL Then if they don't need much maintenance I could use them a security guards .

LAGO A recharge and maintenance the rutan travel pod can do itself, and can use a map of the city ,while it runs on metal runners throughout the city .

RELL My adjudicators are willing to let one travel machine Patrol each zone of KALDOR CITY to chase anyone while checking people's ID.

COMISSIONER MILES We can give the first RUTAN in your MARK 1 travel machine ZONE NINE.

STENTON RELL And small recharge points between the shop fronts and that way the Citizens will get used to the ruton travel machines.

CASTAN LAGO They'll be limited to a sink plunger and an egg whisk for appendages and when they speak two lights will light up on their domain.

STENTON RELL But only one per Zone.

LANDERCHILD I'll make a report to the high council

LOGO I'll give you students from KALDOR university to help you test the rutan travel machine.

COMMISSIONER MILES Stop the students campaigning against nuclear missiles and fast food.

COMMISSIONER MILES There there to help my adjudicators police the city, not replace them .

From tannoy speakers above the archway RELL gets a call from GAVIN SAUNDERS .

GAVIN SAUNDERS Sorry to disturb you first master but the SONS OF KALDOR are campaigning against instant mashed potato ,POWDERED MILK and custard powder and the arts and craft departments have made new banners they formed a human's chain around companies Central .

LANDERCHILD I'LL DEAL WITH THIS, RELL PUT

ME ON MAIN SPEAKER

Listen up citizens of KALDOR.....

Most of you young people don't have to break their backs pulling heavy pallets of liquid so go back to your homes and use the dried prepackaged products

Use tap water boiler kettle and use CADBURYS MASH potato advertised by the service Androids of Zog powdered milk will be from Marvel and the custard will be Birds custard .

And don't forget to use KORONA MARGERINE because housewives in New Zealand campaigned at Sydney Harbour when they run out .

FOR MASH GET SMASH

There are areas of Arcadia where only the founding families can enjoy

take my advice if you want to be a leading KALDOR citizen or you won't be members of the founding families who enjoy the full time in ARCADIA.
